## Goal

To work as a Junior UX Designer.

## Summary

I am a Junior UX Designer with a very clear goal: to understand user needs and create interfaces that meet their expectations and requirements in the shortest time possible.

I am highly communicative and possess a collaborative mindset, which allows me to work effectively in teams, embrace feedback, and engage empathetically in all stages of user research.

Motivated and invigorated by the prospect of acquiring new knowledge, I am consistently in pursuit of learning and exchanging experiences. Furthermore, I place great value on organization, productivity, and time management, enabling me to expedite projects, achieve faster deliveries, and maintain superior quality.

By applying my analytical skills, user research expertise, Figma prototyping, and streamlined usability testing, I craft visually captivating, useful, and user-centered interfaces. Ultimately, I validate design hypotheses, adding significant value to brands.

## Experiences and Projects

### Striking Bets

August 2023

- Sports betting app project developed to put my skills as a Junior UX Designer into practice.
- **Main achievements:**

Applied user research skills and techniques through interviews and Google forms.

Conducted usability testing, created wireframes, and developed high-fidelity prototypes.
